DENNETT'S PROJECT

In From Bacteria to Bach and Back, Dennett considers two main questions First, how can natural selection, a blind, bottomup process devoid of foresight and comprehension, produce intelligent designers? How do we get from bacteria to Bach? Second, how can the intelligent designers produce computer programs like Watson,

The Illusionist

“Bacteria,” “Bach,” and so on—but the scenery looks very familiar, if now somewhat overgrown, and it is hard not to feel that the path is the same one that Daniel Dennett has been treading for five decades I suppose it would be foolish to expect anything else As often as not, it is the questions we fail
