Design Evaluation Methods Mainly, there are three methods that help in evaluating design ideas; pass-fail evaluation, evaluation matrix and SWOT analysis. These methods can be implemented individually or in a sequence-based number of steps on the number of creative ideas and the type of the evaluation required.

How to Evaluate Design Ideas

DESIGN EVALUATION Designing a new component or product, modifying an existing one, and/or evaluating the field performance of a product already in the marketplace involves a thoughtful analysis of the intended use, the operator and operating environments, and the applicable performance standards or requirements.

Since design is a multiple criteria decision-making (MCDM) problem, this study adopts a model which is a hybrid of factor analysis and the Decision Making Trial and Evaluation Laboratory method (DEMATEL). The DEMATEL method is used to simplify and visualize the interrelationships between criteria in making a decision.
