possible. Most of its library consists of public domain titles, but it has other stuff too if you're willing to look around.

Ehx Memory Man Schematic

In roughly one month the Deluxe Memory Man will start shipping in our diecast chassis (see right), and the classic 'trapezoid' design (photo above by Eric Archer) will be discontinued. The new Deluxe Memory Man will feature the exact same warm analog circuit, but now in a more pedalboard-friendly enclosure.

Harmonix | EHX.com

Electro Harmonix Memory Man The original Memory Man was an early bucket brigade delay (BBD) effect pedal that allowed musicians to create long echo effects without using tape. It has been claimed by Mike Matthews (founder/owner of Electro Harmonix) that the Memory Man was the first such "stompbox" type of effect for echo.

Electro Harmonix Memory Man - www.davidmorrin.com

Memory Man op-amp IC chip upgrades There are a few web sites and posts about improving the sound of an EH deluxe memory man, by replacing the normal 4558 op amps with some high tech chips. The noise and tone in a memory man comes from the BBD chips, not the op amps. The BBD chips have about 10,000 times more noise, and very low fidelity.

Deluxe Memory Man analog delay
DISCONTINUED : New DMM XO is now available, see buyanalogman.com for more info. EH Deluxe memory man with modulation, This is one of the best sounding ANALOG DELAYS available. If you blend in a TOUCH of the chorus along with the delay, you get a natural modulation of the delay, which sounds just like an echoplex or echorec delay.
