Whey is the by-product of the manufacture of cheese, which can vary depending on the type of cheese. For example, whey can be found in “sweet,” “acid,” and “salty” forms depending on what type of cheese is being produced or where in the production the whey is removed (Ramchandran and Vasiljevic 2013). Whey can be generally regarded as milk without casein and fat (Daufin et al. 2001).
