SAE J1939 Monitor, Analyzer, And ECU Simulator Software ...

Communication with Caterpillar ECM over J1939. When the machine control system is first powered up, and the engine is not running, the System Log logs several J1939 events related to a couple of PGNs. Has anyone else seen this before? I don't believe it is the PGN timeout, as there are several ECM PGNs with timeouts that don't log errors.

J1939 Error - Caterpillar ECM / Software / IQAN

The engine power status, regardless of SAE J1939 or SAE J1708J1587, is a matter of great discussion between experts. There is simply no PGN/PID that would indicate engine power (in this case "power" referring to voltage supply).

Greetings everyone, The last few months I have been working on a project to read basic J1939 and/or J1708 PGN from a CAN Bus Network. The idea is just to read basic parameters such as Engine Hours and Total Distance from the Vehicle, to keep track of all our fleet and automatically have registers on our database of the Engine Hours and the Distance the vehicles travelled.
