Medicine, Culture and Mothers' Bodies is articulate, thoughtful, carefully researched and argued. It breaks new ground in both feminist and philosophical scholarship. Kukla encourages us to reflect critically on what mothers expect of themselves, and what society expects of mothers. -- Amy Mullin, University of Toronto  
Mississauga

One form, to be called 'mass anxiety hysteria', consists of episodes of acute anxiety, occurring mainly in schoolchildren. Prior tension is absent and the rapid spread is by visual contact.

Treatment consists of separating the participants and the prognosis is good.
