In the eighteenth century, two rival theories of organic generation existed. This book takes the debate beyond its observational basis and shows that at issue were not only specific embryological problems but also fundamental philosophical questions about the natural world and the way science should explain it.

In the eighteenth century, two rival theories of organic generation existed. The 'preformationists' believed that all embryos had been formed by God at the Creation and encased within one ather to await their future appointed time of development, while the 'epigenesists' argued that each embryo is newly produced through gradual development from urganized material.
