The blood is the carrier of life to the physical body and it is breath, not food, that keeps the blood flowing in our veins. It is breath not food, that purifies the blood streams and keeps new, fresh, red, oxygenated blood going the rounds of the human tide. The rise and fall of the body forms the suction power which sends it onward laden with its life giving force.

Unlike a catalytic converter which is a flow-through device, a DPF retains bigger exhaust gas particles by forcing the gas to flow through the filter; however, the DPF does not retain small particles and maintenance-free DPFs break larger particles into smaller ones. [citation needed] There are a variety of diesel particulate filter technologies on the market.
